SUMMARY

Results-driven Software Engineer with 3 years of experience building and optimizing scalable web applications and eCommerce platforms. Strong in Magento 2 (Luma & Hyva), Laravel, and modern JavaScript frameworks (React.js, Next.js, Vue.js) with backend exposure to Node.js. Experienced in API integrations, performance optimization, and Hyva migrations. Leverages AI tools to accelerate development, improve code quality, and deliver high-impact solutions.

EXPERIENCE

Software Engineer

July 2023 – Present

Netwin Infosolutions

Nashik, India

- Developed and maintained Magento 2 and Laravel applications, contributing to end-to-end delivery of scalable eCommerce solutions
- Built custom modules, plugins, and APIs; handled upgrades, patching, and server migrations
- Optimized performance via query tuning, caching, and frontend improvements (Core Web Vitals)
- Integrated third-party services including Stripe and PayPal ensuring secure transactions
- Collaborated with cross-functional teams to troubleshoot issues and deliver production-ready solutions
- Applied secure coding practices and leveraged AI tools to accelerate development and debugging
- Awarded “Rising Star of the Month” (Jan 2026) for outstanding performance, proactive problem-solving, and consistent delivery of high-quality solutions

PROJECTS

MPT (Magento 2 Platform) | *Magento 2, PHP, MySQL, AWS*

- Developed custom Magento 2 modules, admin features, and automation scripts for efficient product and order data management
- Resolved complex conflicts between third-party extensions and improved overall system stability and maintainability
- Integrated payment gateways including Stripe and PayPal ensuring secure and seamless transaction processing
- Handled Magento upgrades, patch installations, and AWS server migration for improved scalability and reliability

Magento Hyva Development | *Magento 2, Hyva, Tailwind*

- Built Hyva-based frontend using Tailwind CSS and migrated legacy Luma components to modern architecture
- Refactored and customized third-party extensions to ensure full compatibility with Hyva ecosystem
- Improved frontend performance and Core Web Vitals through optimized asset loading and rendering

Medical Management System | *Laravel, Vue.js*

- Developed a multilingual web application with role-based access supporting multiple user types including doctors, clinics, patients, and pharmacy modules
- Implemented payment integration using PayPal along with email configuration, WhatsApp messaging, and SMS notification systems
- Designed and built dynamic CRUD interfaces and interactive forms using Vue.js with efficient state management

Next.js Applications | *Next.js, React, Strapi, AI Tools*

- Developed a CMS-driven web application using Strapi and Next.js with custom components dynamically rendered on frontend based on design requirements
- Created a custom Strapi plugin to publish posts with media across multiple platforms including Instagram, Facebook, Twitter, and YouTube via integrated APIs
- Integrated and displayed social media feeds (Instagram, Facebook, YouTube) on frontend, rendered as grid, slider, and listing widgets
- Leveraged AI tools (ChatGPT, Codex) to accelerate development, including generating reusable frontend components, researching third-party APIs, and implementing authentication flows for social platform integrations

AI-ASSISTED DEVELOPMENT & PRODUCTIVITY

AI Tools Used Across Projects | *Codex, ChatGPT, Antigravity, Perplexity*

- Used Codex in VS Code during Hyva theme development to accelerate implementation of Tailwind CSS, Vanilla JavaScript, and Alpine.js code based on project requirements
- Used Antigravity to help build a CRM-based Laravel project from scratch, including user management, product management, sales, and branch modules using Laravel, Blade, Bootstrap, and JavaScript
- Created project-specific AI context and master prompts to help tools like Codex and Antigravity parse the full codebase, understand module flows, and generate version-wise project and module details before starting new tasks
- Used ChatGPT, Codex, and Perplexity for debugging, technical research, and identifying implementation steps for SEO improvements including meta titles, meta descriptions, keywords, and page speed optimization

PYTHON & AI DEVELOPMENT

Django CRM with ML Insights | *Python, Django, ML Libraries*

- Developed a CRM system using Django with modules for sales tracking and product management
- Integrated Python ML libraries to analyze sales data and visualize trends using graphs
- Implemented predictive logic to identify high-demand products based on historical data

AI Chatbot Development | *Python, NLP*

- Built chatbot solutions using Python for handling user queries and automated responses
- Designed conversational flows and integrated AI-based responses for improved interaction

TECHNICAL SKILLS

Backend: PHP, Magento 2, Laravel, Node.js, Python
Frontend: JavaScript, React.js, Next.js, Vue.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Alpine.js
Database: SQL, MySQL, PostgreSQL
Tools: Git, Docker, AWS Cloud, CI/CD, Agile Software Development, Composer, NPM, REST APIs, GraphQL, Linux, Cron Jobs, Apache, Nginx, VS Code
AI Tools: ChatGPT, GitHub Copilot, Perplexity, Gemini, Codex IDE Agents, Antigravity

EDUCATION

Sanjivani College of Engineering	Kopargaon, India
<i>B.Tech in Information Technology (CGPA: 8.3)</i>	2019 – 2023
<i>Honors Degree in Cyber-Security & Ethical Hacking</i>	2021 – 2023
S.S.G.M College	Kopargaon, India
<i>Junior College (Score: 65%)</i>	2017 – 2019
Kendriya Vidyalaya	Manmad, India
<i>School (CGPA: 9.6)</i>
