SUMMARY

Software Engineer with more than 3 years of experience developing and optimizing Magento 2, Laravel, and PHP-based web applications and eCommerce platforms. Strong experience in Magento 2, custom module development, Hyva, third-party integrations, REST APIs, payment gateways, cron jobs, and performance optimization. Experienced in modern JavaScript technologies including React.js, Next.js, and Vue.js, with additional exposure to Node.js and CMS platforms such as Strapi and WordPress

EXPERIENCE

Software Engineer

July 2023 – Present

Netwin Infosolutions

Nashik, India

- Developed and maintained Magento 2 and Laravel applications, contributing to end-to-end delivery of scalable eCommerce solutions
- Built custom modules, plugins, and APIs; handled upgrades, patching, and server migrations
- Optimized performance via query tuning, caching, and frontend improvements (Core Web Vitals)
- Integrated third-party services including Stripe and PayPal ensuring secure transactions
- Collaborated with cross-functional teams to troubleshoot issues and deliver production-ready solutions
- Applied secure coding practices and leveraged AI tools to accelerate development and debugging
- Awarded “Rising Star of the Month” (Jan 2026) for outstanding performance, proactive problem-solving, and consistent delivery of high-quality solutions

PROJECTS

Magento 2 Based E-commerce Platform | *Magento 2, PHP, MySQL, AWS*

- Developed custom Magento 2 modules, admin features, and automation scripts for efficient product and order data management
- Resolved complex conflicts between third-party extensions and improved overall system stability
- Created and optimized cron jobs for automated tasks including inactive customer cleanup and scheduled data synchronization
- Integrated Magento 2 with Zoho CRM to synchronize customer, order, and product data through APIs and automated background processes
- Managed Magento 2 version upgrades and applied security patches, upgraded third-party extensions, resolved extension compatibility conflicts, and performed required fixes to maintain a secure and stable platform
- Built Hyva-based frontend using Tailwind CSS and migrated legacy Luma components to modern architecture
- Refactored and customized third-party extensions to ensure full compatibility with Hyva ecosystem
- Optimized website performance and Core Web Vitals through asset and rendering optimization; improved SEO by managing meta titles/descriptions, XML sitemaps, and web crawling/indexing configurations

Medical Management System | *Laravel, Vue.js*

- Developed a multilingual web application with role-based access supporting multiple user types including doctors, clinics, patients, and pharmacy modules
- Implemented payment integration using PayPal along with email configuration, WhatsApp messaging, and SMS notification systems
- Designed and built dynamic CRUD interfaces and interactive forms using Vue.js with efficient state management

Student Exchange Platform | *Laravel, MySQL, JavaScript, Bootstrap, Stripe*

- Developed a Laravel-based platform for managing student exchange programs, host family placements, student onboarding, and homestay bookings
- Built multi-step student registration and country/program selection flows with interactive JavaScript-based UI and animations
- Integrated Stripe for secure processing of registration fees, program deposits, and recurring accommodation payments
- Implemented automated email notifications for applications, host approvals, payment updates, and status changes across user roles

WordPress CMS and WooCommerce Projects | *WordPress, PHP, WooCommerce*

- Developed and customized multiple WordPress websites from scratch, including custom themes and responsive layouts based on Figma designs
- Developed and customized WordPress plugins and implemented custom post types to support project-specific business requirements
- Built and customized WooCommerce stores, extending eCommerce functionality through plugin configuration and custom development
- Implemented SEO and performance optimizations including meta data updates, sitemap configuration, responsive improvements, and frontend optimization

Strapi CMS Applications | *Next.js, Strapi, Custom Plugins*

- Developed a CMS-driven web application using Strapi and Next.js with custom components dynamically rendered on frontend based on design requirements
- Created a custom Strapi plugin to publish posts with media across multiple platforms including Instagram, Facebook, Twitter, and YouTube via integrated APIs
- Integrated and displayed social media feeds (Instagram, Facebook, YouTube) on frontend, rendered as grid, slider, and listing widgets
- Developed a custom Strapi localization plugin to inherit media across locales, featuring configurable admin controls to selectively enable field-level asset sharing.

TECHNICAL SKILLS

Backend: PHP, Laravel, Magento 2, Symfony, WordPress, Node.js, Express.js

Frontend: JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, React.js, Next.js, Vue.js

Databases & Tools: SQL, PostgreSQL, Git, CI/CD, Linux, Google Cloud Console, AWS(EC2, S3, IAM)

APIs & Integrations: REST API, GraphQL, Stripe, PayPal, Social Media APIs (Instagram, Facebook, X/Twitter, YouTube)

AI Tools: Claude Code, Codex, Antigravity, Agentic AI

EDUCATION

Sanjivani College of Engineering

B.Tech in Information Technology (CGPA: 8.3)

Honors Degree in Cyber-Security & Ethical Hacking

Kopargaon, India

2019 – 2023

2021 – 2023

S.S.G.M College

Junior College (Score: 65%)

Kopargaon, India

2017 – 2019

Kendriya Vidyalaya

School (CGPA: 9.6)

Manmad, India
